LEVEL OF SATISFACTION WITH MAJOR ROADS

- Satisfaction with major roads is low.
- The mean level of satisfaction is 4.015 out of 10.
- The median score is 3 out of 10.
Outdoor activities around the house are often cited as enjoyable weekend activities. Visiting parks and historical sites, as well as using walking/biking trails, score above average (40.7).

These results are consistent with the high rankings for green space and historic preservation on the quality of life question.
IS OUR REGION WELL PREPARED?

Perceived Regional Preparedness

- The mean score is 2.71 out of 5.
- The median score is 3 out of 5.
- 6% of those surveyed strongly agreed the region is well prepared for emergencies.
- 12% of those surveyed strongly disagree the region is well prepared for emergencies.
ADDITIONAL COMMENTS AND SUGGESTIONS

- There are concerns about the effect of overdevelopment on the region’s natural eco-system.
- Traffic and congestion appear frequently as concerns.
- People praised the new walking and biking trials and wish there were more of them.
- Suggestions about public transportation were often mentioned.
- Some survey takers would like to see more efficient public transportation between major metropolitan areas.
