e Day! on 2/7/18
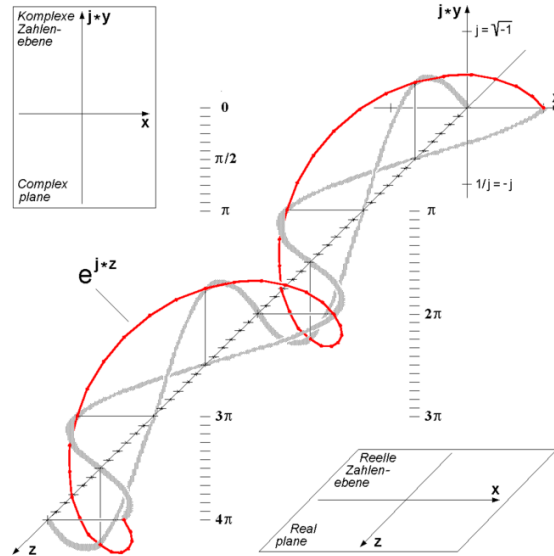

Starting at noon in the Math Dept Lobby

Three-dimensional visualization of Euler's formula.

Why? Because Euler's Number e = 2.718... represents the base of natural logarithms, among other wonderful properties.

We will have a potluck so if you can bring some e-themed food, please let Dr. Sumner at ssumner@umw.edu know.

The Potluck could feature food that begins with e, like eclairs, eggrolls, or enchiladas, as well as food shaped like e or polyhedra or logs, or perhaps NATURAL food! The possibilities are endless.

Come if you can, whether you can bring food or not.
Remember, this year is the only year we can properly celebrate e Day!
