

Interactions of Light and Matter: From Light Interactions That Mattered

A colloquium sponsored by the Society of Physics Students

Lana Chaleunrath-Pham

MS Physics Graduate from Kansas State University

"Come one, come all for the amazing Lana! Former UMW physics student and now recently former Kansas State physics student, she returns to relay the events of her far travels and how she began on this voyage of the pursuit of knowledge. From being a bug-eyed pupil in PHYS105 to harnessing the power of light to manipulate her environment! YOU too can learn the secrets of using femtosecond pulsed lasers to understand molecular dynamics! She will share tales of her time at UMW and beyond, in hopes that it will inspire, entertain, and inform. Come join the show!"

Friday, November 21th, 2025

4:00 PM EST in Jepson 225

Please contact SPS president Boone Fleenor at bfleenor@mail.umw.edu any questions!

Hosted by the Department of Chemistry and Physics

Open to all who wish to attend
